If you answered yes, you are not alone. Many labs grapple with these questions daily. In a quest to become compliant, labs depend on their IT team for setting up a secure networked environment.

Our SoftMax® Pro GxP Software Suite can scale up from a single computer to a global networked environment. Our Professional Services team will partner with your IT team to plan and implement a secure networked SoftMax Pro GxP Software application suite according to your requirements.

Benefits of a secure networked environment

- Secure, reliable, centralized data repository for easy data sharing—protects against data loss and minimizes failure compared to desktop hardware
- Reduced user management tasks—can control projects, user permissions, and accounts from a single location
- Consolidated, comprehensive system audit trails help prevent audit complications
- Valuable time freed up to focus on research instead of server installation or maintenance
- IT department not required to be a part of the data access process after installation

**Computer requirements**

**Client computer**
- Windows 10 Pro/Enterprise 64-bit
- Intel Core i5 or higher with 8 cores
- 16 GB RAM (8 GB minimum)
- 50 GB of hard drive space
- Windows PowerShell 5.1

**Server computer**
- Windows Server 2016 or 2019
- Intel Core i5 or higher with 8 cores
- 16 GB RAM
- 50 GB of hard drive space
- Microsoft SQL Express or SQL Server 2016 or 2017
- Windows PowerShell 5.1
- Configured DNS active for all connected computers
- Firewalls and routers configured to allow data transfer using ports 8210, 8211, 1433, and 1434

**Software part number** SMP712GXP-SVR-LIC

**Software remote installation service part number** SMPGXP-INSTALLSVR-OS

**Customized installation service** SMPGXP-INSTALLADVSVR-OS

**Additional client computer installation service** SMPGXP-INSTALLCLT-OS

**Additional user license part number** SMP GXP SVR ADD

**Software maintenance**
- SMPCARE-GXP-ESSENTIAL
- SMPCARE-GXP-PREFERRED

The Multi Computer Installation Service includes a consultation call with our Professional Services team to ensure the software and installation meet your IT infrastructure needs. Please begin to discuss the following topics with your IT support team.

- Contact information for IT group if they will be involved with the installation
- Server type: bare metal or virtualized (Hyper-V or VMWare)
- Internet access for remote installation
- Server information
  - SQL database may be colocalized on the same server as the GxP Admin software or on separate servers
  - SQL database information
  - Single site, multisite, or global database access
  - Active directory integration
  - Installation service package type
  - Standard or advanced
