IXM Taskbar version 5.0 - Installation

- 1. Copy the provided IXMTaskbar_v5-0.jzp file to the IXM computer. The IXM must be using MX 4.0 or MX5.0.
- 2. Start up MetaXpress and go to *Journal > Import Journal Suite*.

 Select the file you copied over, and the C:\MX4\Taskbars directory or C:\MX5\Taskbars directory (if this directory does not exist in the current MetaXpress folder, please create it). Click Import.

and Import Journal Suite	- 0 🔀
Select journal suite to import:

 Press Select Journal and navigate to the C:\MX4\StartUp directory or C:\MX5\StartUp directory. Select the startup journal found there. It should be the appropriate journal for the IXM system, either Standard or XL. Press OK.

- 9. Now exit and restart MetaXpress for changes to take effect.
- 10. Verify that the taskbar is loading properly.

11. Also verify that Pick Point appears in the Journal > Recording Tools menu (it may be grayed out, which is fine).

12. Repeat steps 4-11 for all groups (configurations).

NOTE: This installation is easier if you perform it prior to creating additional groups (configurations) in Meta Imaging Series Administrator. Additional groups should then be created using the option to Copy Settings from an existing group.

Please contact Molecular Devices Tech Support with any issues or questions.
